Art Unit: 3731

Claims 22-50 (beginning with the second claim 22) have been renumbered as claims 23-51, respectively since two claims have been numbered as claim 22.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, 50 and 51, drawn to a stent and a method of using a stent, classified in class 623, subclass 1.15.
- II. Claims 26-49, drawn to a method of producing a stent, classified in class 29, subclass 592.

The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example, it could be made without the annealing step.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3731

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
